

Plaintiff Desmond R. Armstrong (“Armstrong” or “Plaintiff”) brings this action on behalf of himself and all other consumers similarly situated, and allege upon information and belief, formed after an inquiry reasonable under the circumstances, except as to those allegations which pertain to the named Plaintiff (which are alleged on personal knowledge), as follows:

NATURE OF THE ACTION

1. This class action is brought against Defendants Costco Wholesale Corporation (“Costco”) and Nice-Pak Products, Inc. (“Nice-Pak”) (collectively referred to as “Defendants”) to recover for the harm caused by Defendants’ deceptive, improper or unlawful conduct in the design, marketing, manufacturing, distribution, and sale of flushable wipes. Flushable wipes include all wipe products marketed and advertised by manufacturers as able to be flushed without causing harm to plumbing and sewer systems.

2. Defendant Nice-Pak manufactures Kirkland Signature Moist Flushable Wipes for Defendant Costco under its generic brand, Kirkland Signature (the “Kirkland Signature Wipes”).

3. Because flushable wipes do not disintegrate immediately upon flushing, like toilet paper, they cause serious problems for homeowners and municipalities alike. An article in *New York Magazine* chronicling the problems caused by flushable wipes points out that flushable wipes do not break down as easily as toilet paper, nor can they, if they are to do their job effectively. Unlike toilet paper, flushable wipes must hold up under the pressure of scrubbing *after* being soaked in water and propylene glycol lotion for an extended period of time. To be useful, flushable wipes must be strong enough to do their job effectively, which cannot be done if they disintegrate in water as easily as toilet paper. Thus “the very thing that makes a wet wipe good at its job makes it a problem once it’s discarded.”¹

¹ <http://nymag.com/news/intelligencer/flushable-wipes-2013-10/index1.html> (last visited May 18, 2015).

4. Plaintiff and other consumers purchased defective flushable wipes designed, marketed, manufactured, distributed, and sold by Defendants as safe to be flushed (the “Class”). Through the ordinary and/or directed use of flushable wipes, consumers across the country experienced plumbing issues, including clogged toilets, clogged pipes, flooding of home basements and other plumbing problems. Plaintiff and members of the Class would not have purchased the flushable wipes and/or paid the purchase price for the flushable wipes if they knew that flushing the wipes would cause the wipes to become clogged in sewer or septic systems. Absent Defendants’ actions, and had Plaintiff and members of the Class known of the defective nature of the flushable wipes, Plaintiff and members of the Class would not have purchased and/or paid the purchase price for the flushable wipes. And, absent Defendants’ actions, and had Plaintiff and members of the Class known of the defective nature of the flushable wipes, Plaintiff and members of the Class would not have used the flushable wipes in their homes and risked damaging the plumbing systems in their homes, or, worse, causing damage in their homes due to backups caused by the use of flushable wipes.

5. Defendants’ conduct violates Oregon’s Unlawful Trade Practices Act, ORS 646.605 et seq. and constitutes negligent misrepresentation, unjust enrichment and a breach of express warranties.

THE PARTIES

6. Plaintiff is, and was at all relevant times, a resident of Jacksonville, Oregon. Plaintiff regularly purchased Kirkland Signature Wipes at a Costco retail location near his home.

7. Defendant Costco, a Washington corporation, together with its subsidiaries, operates membership warehouses. The company offers branded and private-label products in a range of merchandise categories, including Kirkland Signature, its generic line. It offers candy, snack foods, tobacco, alcoholic and nonalcoholic beverages, and cleaning and institutional supplies; appliances,

electronics, health and beauty aids, hardware, office supplies, cameras, garden and patio, sporting goods, toys, seasonal items, and automotive supplies; dry and institutionally packaged foods; apparel, domestics, jewelry, house wares, media, home furnishings, and small appliances; and meat, bakery, deli, and produce. The company also operates gas stations, pharmacies, food courts, optical dispensing centers, one-hour photo centers, and hearing aid centers, and travel businesses. In addition, it provides business and gold star (individual) membership services. Headquartered in Issaquah, Washington, Costco common stock trades on the NASDAQ Global Select Market under the ticker symbol "COST."

8. Defendant Nice-Pak, a New York corporation, together with its subsidiaries and affiliates, designs, manufactures, markets, and distributes branded and private label pre-moistened wipes products. Nice-Pak manufactures purportedly flushable wipes products under its Nice 'n Clean brand, and it also manufactures similar products for private-label retailers including Costco, Target, and CVS. As relevant here, Nice-Pak manufactures the Kirkland Signature Wipes. Headquartered in Orangeburg, New York, Nice-Pak is a private company with production facilities located throughout the country.

9. Defendants, upon becoming involved with the manufacture, distribution, advertising, marketing and sale of flushable wipes, knew or should have known that their representations regarding flushable wipes were false and misleading.

JURISDICTION AND VENUE

10. This Court has original jurisdiction over this matter, pursuant to 28 U.S.C.S. §1332(d), in that the matter in controversy exceeds \$5 million, exclusive of interest and costs, and is a class action of more than 100 potential Class members in which Plaintiff is a citizen of Oregon and Defendant Nice-Pak is both incorporated and has its principal place of business in New York.

11. Venue properly lies in this district as the facts and claims at issue in this action are substantially related to *Kurtz v. Kimberly-Clark Corp., et al.*, No. 1:14-cv-1142-JBW-RML and *Belfiore v. The Procter & Gamble Co.*, No. 14-cv-4090-JBW-RML, which are currently pending in this District.

SUBSTANTIVE ALLEGATIONS

12. The pre-moistened wipes market is a \$6 billion-a-year industry with consumer sales growing approximately 5% each year since 2007. The industry is expected to grow 6% annually over the next five years.

13. There are currently no legally enforceable requirements that a product must meet in order to claim that it is “flushable,” only voluntary industry guidelines that may be followed at the discretion of manufacturers.

14. Defendant Costco states, in the respective product overview sections on their website, that the Kirkland Signature Wipes are “flushable” and “safe for well-maintained sewer and septic systems,” and that the products “break[] apart when flushed.”²

15. On the packaging of Kirkland Signature Wipes, in big letters is “moist flushable wipes” and the statement “safe for well-maintained sewer & septic.” The only warning on the box as potentially problems consumers may have as a result of flushing Kirkland Signature Moist Wipes is a yellow bubble stating “never flush more than one wipe at a time[.]”

² <http://www.cvs.com/search/N-0?searchTerm=flushable> (last visited May 18, 2015).

16. A true and correct representation of the front panel of the package for the Kirkland Signature Wipes appears below:

17. In the “frequently asked questions on flushability” section of Costco’s Kirkland Signature Wipes site, when asked whether the wipes are really flushable, Costco states “Yes, Kirkland Signature™ Moist Flushable Wipes comply with industry guidelines and are proven to pass through a home’s well-maintained toilet, pump and drain line without clogging. The wipe is very different than other wipes and made of a special material.” When asked how consumers can know if a wipe is flushable, Costco instructs to “[l]ook for the Do Not Flush logo that is starting to appear on many products that are not flushable or read the directions on the package on how to dispose of properly.”

18. On Costco’s website, the only restrictions on the flushing of Kirkland Signature flushable wipes is that they “are not recommended or flushing in motor homes” and to “[m]ake sure

sewer and septic systems are well-maintained and there are no tree roots growing in the sewer lines.”³

19. Other flushable wipe brands manufactured by Defendant Nice-Pak make similar flushability claims. For example, in addition to the CVS Brand Flushable Products, the Total Home by CVS Flushable Moist Wipes makes similar claims on its packaging that the wipes are “flushable.” In fact, according to their website, CVS encourages consumers to compare the Total Home by CVS Flushable Moist Wipes to Cottonelle Fresh Care Wipes, which are similarly labeled as “flushable.” Likewise, the overview section for the Total Home by CVS Flushable Moist Wipes states that the product is “[s]afe for most sewers and septics” and that the wipes “break[] apart when flushed,” as depicted below:⁴

20. In addition to the flushable wipes manufactured by Defendants, many other brands of wipes are being marketed as “flushable.” As noted Kimberly-Clark Corporation’s Cottonelle brand flushable wipes products are touted as being “flushable” and “sewer- and septic-safe.”⁵ Charmin

³ <http://www.costco.com/Kirkland-Signature%e2%84%a2-Moist-Flushable-Wipes%2c-600-Wipes.product.11767169.html>

⁴ <http://www.cvs.com/shop/household-grocery/paper-plastic-products/bath-tissue/total-home-by-cvs-flushable-moist-wipes-refill-skuid-420030> (last visited May 19, 2015).

⁵ <https://www.cottonelle.com/products/cottonelle-fresh-care-flushable-moist-wipes>

Freshmates are marketed as “flushable wet wipes [that] provide a cleaner clean than dry bath tissue alone,”⁶ while Pampers Kandoo Flushable Toilet Wipes are marketed as “your little one’s first toilet wipe.”⁷ Wet Ones Fresh ‘n Flush personal hygiene wipes claim to be “gentle on your plumbing” and assure consumers that they can simply “flush ‘em away,”⁸ and Dynarex Flushable Wipes claim to “easily break[] down back to fibers as [they go] through the pipes.”⁹

21. Large chain retailers are also offering generic brands of wipes that claim to be flushable. Walmart, for example, purports that its Great Value Flushable Wipes “[b]reak[] apart when flushed” and are “safe for sewer and septic systems,”¹⁰ and that its Equate Flushable Wipes “break apart after flushing like toilet paper, reducing the chance for blockage at home and in waste management systems.”¹¹ Target claims that its Up&Up Toddler and Family Wipes are flushable and “sewer and septic safe.”¹²

⁶ http://www.charmin.com/freshmates-flushable-wipes.aspx?utm_source=msn&utm_medium=cpc&utm_campaign=Charmin_Search_Desktop_Category+Interest.RF&utm_term=flushable%20wipes&utm_content=8N9FB9pv_flushable%20wipes_e_2095917578 (last visited May 19, 2015).

22. Many chain drugstores offer their own brands of wipes purporting to be flushable. Walgreens Flushable Cleansing Cloths claim to be “safe for sewer and septic systems,”¹³ and Rite Aid Flushable Moist Wipes claim to be “safe for septic tanks and sewers.”¹⁴

Homeowner Horror Stories

23. Despite Defendants’ marketing wipes as safe to flush, homeowners from all over the United States have suffered plumbing issues, such as clogged toilets, clogged pipes and flooded basements, as a result of the flushing purportedly “flushable” wipes. The problem with flushable wipes is clear: they do not break down as manufacturers advertise.

24. In Jacksonville, Florida, Kevin Herbertson learned the truth – that flushable wipes are not flushable – when sewage overflowed into the laundry room and backyard of his 88 year-old mother’s home. Herbertson stated that he has spent hundreds of dollars in plumbing services to clear out the clogs caused by flushable wipes.¹⁵

25. Frank Freece, the plumber who cleared the pipes at Herbertson’s mother’s home, said in 2014 alone he has been called to clear ““flushable wipes’ stoppages in two to three dozen homes.” Freece stated: “They’re worse than paper towels or feminine products. . . [b]ut, because they’re marked ‘flushable,’ people think they can just go right on down.”¹⁶

26. A poster identified as “Nancy,” the founder of NancysVacationRentals.com, who owns about 50 rental properties in San Diego, posted on the blog vacationrentalmarketingblog.com

¹³ <http://www.walgreens.com/store/c/walgreens-flushable-cleansing-cloths/ID=prod6015923-product> (last visited May 19, 2015).

¹⁶ *Id.*

about her “horror story” experience with a renter who used flushable wipes.¹⁷ After the renters, a family of five, called complaining that the toilet was backing up into the shower, Nancy sent a plumber over to snake the drain. The renters then complained a second time, two days later, of the same problem. Since this particular house had never had plumbing issues before, Nancy sent over a different plumber, this time with a camera, to see what the source of the clog was. Nancy wrote: “The first thing this plumber noticed was a package of ‘flushable wipes’ sitting near each toilet and the camera confirmed that there were ‘flushable wipes’ hanging on every little piece of rust or corrosion in the cast iron pipes that could possibl[y] snag one of those cloth wipes and he said they never break down.” Concerned by this, Nancy called the first plumber who originally came to remedy the problem, and asked him what he had pulled out of the drain. He told her he had pulled out “some type of cloth things.” Since the flushable wipe users left the home, Nancy has not had any plumbing issues at the house. After putting in a claim, her insurance paid over \$800 in plumbing expenses to remedy the problem caused by the flushable wipes.

27. A reader identified as “Emery,” wrote into Consumerist.com, a consumer watch dog website, complaining that he only used three Cottonelle flushable wipes on three different days, but when he flushed the toilet, they caused a backup. After having a plumber come to snake out his plumbing, the plumber told him that the cause of the backup was something that looked like diapers, which turned out to be the three flushable cleansing cloths.¹⁸

28. Jim Kneiszel recently wrote an article for *Pumper*, an e-magazine for pumping contractors, detailing his experience with flushable wipes. Due to a medical condition, Kneiszel’s household was using a lot of flushable wipes and purchased them specifically because they were

¹⁷ http://www.vacationrentalmarketingblog.com/flushable_wipes/ (last visited May 19, 2015).

¹⁸ <http://consumerist.com/2014/02/04/cottonelle-wipes-say-theyre-flushable-but-my-plumber-disagrees/> (last visited May 19, 2015).

labeled “flushable.” One morning, he woke up to three inches of dirty water in his basement caused by “[a] clog of wipes that were hung up in the system before they could fall into the sewer pipe and float away from [his] house.” The plumber Kneiszel called to snake out his home’s pipes told him: “I don’t care what the box says, these wipes are not flushable. And this happens all the time.”¹⁹

29. Kneiszel posted the photos below, explaining that they depict “how wipes reached the first 5 feet of drainfield, which has to be evacuated and replaced. It took Goodman Sanitation more than a day to repair the clogged system. Technicians removed a half-dozen 50-gallon bags of wipes from the septic system.”²⁰

Testing for Flushability

30. Consumer Reports performed its own independent disintegration test on flushable wipes that simulated toilet flushing conditions. A video clip of the test showed that standard toilet paper broke down in about eight seconds, but flushable wipes did not break down after ten minutes

¹⁹ http://www.pumper.com/editorial/2013/06/wipe_out (last visited May 19, 2015).

²⁰ *Id.*

and, even more shocking, *still* did not break down after being placed in a Kitchen Aid mixer for the same period of time.²¹

31. The Orange County Sanitation District also conducted its own test to evaluate the dispersibility of allegedly “flushable” products. According to a Staff Report dated May 30, 2012, one sheet of Costco Wholesale Corporation’s (“Costco’s”) Kirkland Signature Moist Flushable Wipes was placed in a one liter sized beaker filled with tap water and containing a stir bar, stirring at a speed of 120 rotations per minute.²² The Orange County Sanitation District found that the wipe did not break down after a full 24 hours, had remained intact with no change in the wipe’s initial dimensions, and was still recognizable after such time. The Orange County Sanitation District also evaluated toilet paper using the same test and found that the toilet paper rapidly dispersed after about 20 seconds. The Orange County Sanitation District concluded that because wipes are not able to disperse, they may adversely affect sewer systems, lift stations and wastewater treatment plants.²³

32. CBS4 Miami, after investigating damage caused by flushable wipes, hired I-P-S testing, the only independent testing facility in the country, to conduct a slosh box test. I-P-S put toilet paper, flushable wipes and non-flushable wipes through the same slosh box test. After one hour, the toilet tissue was barely visible, but the flushable and non-flushable wipes were fully intact. After two hours, the toilet tissue had dispersed completely, the flushable wipes had “shredded some, but visible chunks still remain[ed]” and the non-flushable wipes had not changed at all. After three

²¹ <http://www.consumerreports.org/cro/video-hub/home--garden/bed--bath/flushable-wipes/16935265001/22783507001/> (last visited May 19, 2015).

²² <http://www.nacwa.org/images/stories/public/2012-08-06ocsddf.pdf> (last visited May 19, 2015).

²³ *Id.*

hours, there was “a trace amount” left of the flushable wipes and the non-flushable wipes remained “pretty intact.”²⁴

33. On Costco’s website, there is a link to a video posted by Cottonelle demonstrating the “dispersability” of Cottonelle Flushable Wipes using the slosh box test.²⁵ The video begins with the message: “What you are about to see is unaltered footage of how COTTONELLE FRESH Flushable Moist Wipes break down in water, so they’ll never clog your toilet[,]” followed by Cottonelle’s logo.²⁶

34. According to the video, the slosh box test can be used to predict the wipes’ ability to break up as they pass through pumps and pipes. The test begins by placing a Cottonelle Flushable Wipe in a tank filled with tap water. The tank is then set into motion to “simulate the physical forces acting to disintegrate the product.”²⁷

35. The video then jumps to 40-50 minutes later, at which time the wipe is still not completely dispersed, and large chunks of the wipe are still clearly visible. After 95-110 minutes, the wipe is still not completely dispersed and although smaller, there are still multiple chunks of wipe remaining.²⁸ Thus, according to Kimberly-Clark’s own slosh box test, Cottonelle Flushable Wipes do not fully disperse after a full 110 minutes.

²⁴ <http://miami.cbslocal.com/2014/02/04/the-trouble-with-wipes-in-your-pipes/> (last visited May 19, 2015).

²⁵ <http://video.costco.com/v/12429/cottonelle-fresh-flushable-moist-wipes/> (last visited May 19, 2015).

²⁶ *Id.*

²⁷ *Id.*

²⁸ *Id.*

36. According to a video posted by Kimberly-Clark, the company's flushable wipe products go through testing to ensure "flushability." Such tests include: (i) the toilet and drain line test; (ii) the sloshbox disintegration test; and (iii) the municipal pump test.²⁹

37. Defendants' toilet and drain line test consists of flushing wipes through only 68 feet of drainline and are supposedly tested on toilets "from all major global regions where K-C-Flushable Wipes are sold."³⁰ The video depicts a wipe being flushed down a toilet and flowing through a clear tube, appearing to be mostly intact. Kimberly-Clark states in the video: "As you can see, [the wipes] easily pass through properly maintained toilets and drainlines."³¹

38. As Kimberly-Clark states in its video, "it is important that flushable materials do not accumulate in the pump, which could lead to decreasing pump efficiency and potentially clogging the pump."³² Kimberly-Clark's municipal pump test consisted of putting one wipe through the pump every ten seconds for ten minutes. The test found that the average pump's power did not "increase significantly during the test[,] " which Kimberly-Clark claims it would have if the wipes had accumulated inside the pump. Kimberly-Clark concluded that this test shows that its flushable wipes "pass through pumps without clogging, interfering or causing strain."³³

39. The slosh box test is meant to "determine the potential of materials to disintegrate when subject to agitation in water."³⁴ Kimberly-Clark's own slosh box test found that the wipe

²⁹ <http://www.youtube.com/watch?v=2FrXNWr2-xo&feature=youtu.be> (last visited May 19, 2015).

³⁰ *Id.*

³¹ *Id.*

³² *Id.*

³³ *Id.*

³⁴ *Id.*

began to break down into “smaller pieces” in 35 minutes and reduced to fibers after three hours.³⁵ The company claims that “by breaking up this way, [its] wipes can safely pass through municipal pump stations commonly present in city sewers.”³⁶

Problems Caused for Municipal Sewers Across the County

40. However, utility officials say that wipes cause a problem because in actuality, they reach a pump in just a matter of minutes, and also because many sewer systems move sewage using gravity, which does not create the same level of agitation used in tests like Kimberly-Clark’s.³⁷

41. In addition, newer toilets that use three-gallon flushes, as opposed to older models that use five-gallon flushes, are also unable to push whole, undispersed wipes down sewage lines.³⁸ Thus, the problem is further exacerbated when wipes are flushed down a newer toilet into an old line without the needed amount of water to flush it, resulting in the wipes not being fully flushed and remaining behind in the system.³⁹

42. Unsurprisingly, if wipes make it through home plumbing systems and are not fully disintegrated when they leave individual homeowners’ pipes, they wreak havoc on city sewer systems. Cities across the country have suffered thousands, if not millions, of dollars in damage to city sewer and water systems due to flushable wipes.

43. When the wipes flow through the home plumbing and sewer systems at various stages of disintegration, they can mix with grease and congeal to form masses in home and city pipelines.

³⁵ *Id.*

³⁶ *Id.*

³⁷ http://articles.washingtonpost.com/2013-09-07/local/41850520_1_baby-wipes-sewer-toilet-paper (last visited May 19, 2015).

³⁸ <http://www.wvgazette.com/News/201310270044> (last visited May 19, 2015).

³⁹ *Id.*

According to Operations Manager of the Charleston Sanitary Board, Tim Haapala, wipes create serious problems for municipal sewer lines, especially when they get mixed up with grease in drains, which results in developing masses in city pipelines that are very expensive to remove. Haapala stated: “They’re not degradable. That’s the problem.”⁴⁰

44. Haapala described the slow buildup of wipes mixing with grease and other debris in pipes “like cholesterol in a vein.”⁴¹ Below is a photo of a Charleston Sanitary Board customer’s lateral pipe, which was completely clogged with wipes and had to be removed.⁴²

45. The problem is occurring all over the country, according to Cynthia Finley, Director of Regulatory Affairs for the National Association of Clean Water Agencies (“NACWA”).⁴³ In fact, the problem is not even limited to the continental United States. In Honolulu, Hawaii, Jesse Broder

⁴⁰ *Id.*

⁴¹ *Id.*

⁴² *Id.*

⁴³ <http://www.usatoday.com/story/news/nation/2013/07/16/wipes-pollution/2522919/> (last visited May 19, 2015).

Van Dyke, a spokesperson for Honolulu Mayor Kirk Caldwell, stated: “The wipes clog sewer lines, pump stations and treatments plants.”⁴⁴ Markus Owens, a Honolulu Department of Environmental Services spokesperson, stated: “These wipes contribute to recurring problems at our pumping stations; they do not break down, and create additional work for our crews who have to repeatedly remove them on a monthly or weekly basis.”⁴⁵

46. According to Finley, “[c]onsumers are being told by the packaging that these things are flushable” and “[a]lthough the material might make it through the toilet and the pipes leading away from the house, they tend to clog up once in the sewer system . . . That can cause huge headaches for the utilities.”⁴⁶

47. In London, perhaps the most dramatic example of the effects flushable wipes can have on sewer systems came to light in the summer of 2013 in the form of “fatberg.” Fatberg was a 15-ton, bus-size clog in London’s sewer system that took three weeks to dislodge.⁴⁷ Fatberg was made up of wipes and coagulated fat, which built up to the point where it blocked a sewer main. Gail Hailwood of Thames Water stated: “The sewer was almost completely clogged. If we hadn’t discovered it in time, raw sewage could have started spurting out of manholes across the whole of Kingston. It was so big it damaged the sewer and repairs will take up to six weeks.”⁴⁸

⁴⁴ <http://www.civilbeat.com/articles/2013/10/11/20030-new-age-toilet-paper-clogging-honolulus-sewer-pipes-causing-headaches/> (last visited May 19, 2015).

⁴⁵ *Id.*

⁴⁸ *Id.*

48. Carter Strickland, commissioner of the New York City Department of Environmental Protection, when interviewed about the problem flushable wipes are causing, told *New York Magazine*: “You can safely say [it’s costing us] millions of dollars.”⁴⁹ One of Strickland’s aide’s provided *New York Magazine* with an estimate that the cost caused by flushable wipes is “about \$18 million per year for extra disposal, and that doesn’t include staff overtime and damaged equipment.”⁵⁰

49. Although screens have been used to filter wipes out, “[t]he Wards Island treatment plant seems to be getting the worst of it, but all around the city, huge gray-black masses of synthetic fiber, steeped in every foul fluid that’s gone down the drain, are regularly being extracted, by hand, from pipes and pumps. Jammed, snarled equipment frequently breaks down, causing ‘a lot of downtime.’”⁵¹

50. According to Strickland, the problem is that wipes, unlike toilet paper, are meant to hold up under soaking a scrubbing, and are “very, very strong, pound for pound, like [a] spiderweb.”⁵²

51. Andrew Jantzer, General Manager of wastewater facilities at York City Wastewater Treatment Plant in Pennsylvania, stated: “At our plant we have a five foot pipe that comes in and all of the sewage comes into that pipe. The first thing it does is goes through these giant rakes, and it rakes out all of the flushable products that have not broken down. The more we can get out at the head of the plant the better. It causes a lot of havoc throughout the rest of the plant if it makes it

⁵² <http://nymag.com/news/intelligencer/flushable-wipes-2013-10/index1.html> (last visited May 19, 2015).

through. It clogs the pumps and channels and all kinds of tanks and other things that we have at the treatment plant.”⁵³

52. In Raleigh, North Carolina, sewer overflows and backups are predominately caused by flushable wipes, according to the city’s environmental coordinator for wastewater, Marti Gibson.⁵⁴ The problem is so bad that Raleigh now has an ordinance prohibiting the flushing of anything except human waste, toilet paper and water.⁵⁵

53. In Bemus Point, New York, local officials fed up with dispatching crews “at least once a week to clear a grinder pump that would seize up trying to shred the fibrous wipes”⁵⁶ set up “basket strainers in sections of pipe leading to an oft-clogged pump [] to figure out which households the wipes were coming from. They mailed letters and then pleaded in person for residents to stop flushing them.”⁵⁷

54. In San Antonio, Texas, where there is over 9,000 miles of sewer line to keep clog-free, San Antonio Water System (“SAWS”) Communications Director Anne Hayden stated: “Ignore the flushable label, because it’s not . . . It adds additional layers of cleanup we already have to do to our pipes. People have to go out in the summer heat and manually extract the buildup and it’s not

pleasant.”⁵⁸ SAWS crews remove three to five tons of debris, enough to fill a 15-foot-long dump truck with debris, per day. Joshua Trent, a member of a four-person SAWS crew, explained when flushable wipes get stuck in the sewer system, they “make it easier for items as small as plastic bags and prophylactics to items as large as car tires, engine blocks and even live animals like turtles, snakes and birds to become lodged in siphon boxes.”⁵⁹

55. Some cities, like Grand Rapids, Michigan, are trying to deal with the problem by educating their citizens and asking them not to flush wipes down the toilet. Grand Rapids officials have sent out a mass mailing to homeowners reminding them “no wipes in the pipes.”⁶⁰ One public education mailer sent out to Grand Rapids homeowners states: “Convenience wipes such as baby, hygienic, cleaning and disinfectant, as well as toilet bowl scrubbers and even paper towels might be labeled as ‘disposable or flushable’ but these items should not go down the drain. Products like these do not break down in the sewer system. They can cause plugs in sewer pipes and pumps and result in sewage backups, costly cleanups and environmental consequences that can cause rate increases.”⁶¹

⁶¹ <http://grcity.us/enterprise-services/Environment-Services/Pages/Environmental-Tip-3.aspx> (last visited May 19, 2015).

56. In addition to Grand Rapids, Waukesha, Wisconsin, Ocean City, Maryland and Sitka, Alaska are just some examples of cities who have publically asked residents not to flush wipes that are labeled as flushable.⁶²

57. The blockages caused by flushable wipes are becoming increasingly costly for municipalities. In California, the Orange County Sanitation District had 971 “de-ragging” maintenance calls on ten pump stations in a single year costing the District \$320,000.⁶³

58. Some municipalities, like the Washington Suburban Sanitary Commission, have turned to purchasing expensive equipment to deal with the problem. The Commission estimates that it has spent more than \$1 million on equipment to shred wipes and prevent blockages.⁶⁴

59. In Vancouver, Washington, officials estimate they have spent over \$1 million replacing three large sewer pumps and eight smaller sewer pumps that were constantly becoming clogged.⁶⁵ Frustrated with dealing with problems caused by flushable wipes, Vancouver sewer officials conducted their own experiment in which they dyed several different kinds of wipes and sent them through the sewer for a mile. The result – the wipes labeled flushable had “little rips and tears but still they were intact” said engineer Frank Dick.

⁶⁵ *Id.*

60. Washington D.C. alone has already spent millions to repair and prevent clogging of city pipes caused by flushable wipes.⁶⁶ Utility DC Water sends workers on “wipes patrol” and has reported that an estimated 500 man-hours have been needed to deal with wipes clogging sewer systems over the span of a year.⁶⁷

61. According to Mary Gugliuzza, Media Relations Coordinator for the Fort Worth Water Department, once wipes make it to the city plant they must be separated and sent to dumpsters or landfills, which costs city residents thousands of dollars.⁶⁸ Because the wipes do not break down fully as soon as they are flushed, they can get caught up in various stages of the sewer system including pumps, lift stations and treatment plants.⁶⁹

62. Roxanne Beal from Frederick County, Maryland’s Well and Septic Division, told *The Frederick News-Post*: “I will tell you from experience that these products do not biodegrade before they catch and clog in a private sewer system . . . (they) become almost like a pile of cement in your tank.”⁷⁰ In 2013 alone, Frederick County had to deal with five sewer overflows, with two of them believed to be caused by wipes. Just one of the overflows resulted in 450 gallons of wastewater spilled and clean-up costs of \$1,500. In light of these issues, the Frederick County Health

⁷⁰http://www.fredericknewspost.com/news/economy_and_business/business_topics/consumer/count-y-don-t-flush-what-says-flushable/article_ba4388b3-e1ba-531b-8970-05a2d6cb7a7b.html (last visited May 19, 2015).

Department now takes the position that even products labeled “flushable” should be thrown in the trash, and not flushed down toilets.⁷¹

63. Municipalities and homeowners share in the frustration that wipe products labeled and advertised as flushable continue to be sold. *The New York Post* has observed that NACWA has been receiving complaints that flushable wipes were causing clogging and backups in sewer systems for the last 4 years. The newspaper also noted that these complaints “roughly coincide[] with the ramped-up marketing of the ‘flushable cleansing cloths’ as a cleaner, fresher option than dry toilet paper alone.”⁷² In addition, *New York Magazine*,⁷³ *USA Today*,⁷⁴ *Huffington Post*,⁷⁵ and numerous local news outlets have all reported on plumbing and sewer problems caused by flushable wipes.

The FTC’s Enforcement Action Against Nice-Pak

64. On May 18, 2015, the Federal Trade Commission (the “FTC”) announced that it entered into a consent order with Nice-Pak in connection with Nice-Pak’s labeling of its flushable products.

65. The consent order stemmed from allegations that defendant Nice-Pak made misleading representations in its advertising and marketing of its flushable moist wipes, including Kirkland Signature Wipes. According to the consent order and associated documents, Nice-Pak lacks adequate substantiation for the claim that its flushable wipes products are safe for household

⁷¹ *Id.*

⁷² <http://nypost.com/2013/09/23/flushable-bathroom-wipes-blamed-for-massive-sewer-clogs/> (last visited May 19, 2015).

⁷³ <http://nymag.com/news/intelligencer/flushable-wipes-2013-10/> (last visited May 19, 2015).

⁷⁴ <http://www.usatoday.com/story/news/nation/2013/07/16/wipes-pollution/2522919/> (last visited May 19, 2015).

⁷⁵ http://www.huffingtonpost.com/2013/09/23/bathroom-wipes-clog_n_3977082.html (last visited May 19, 2015).

plumbing, household septic systems, and public sewer systems. According to the FTC’s complaint, Nice-Pak violated the FTC Act by misrepresenting that its wipes: (1) are safe for sewer systems, (2) are safe for septic systems; (3) break apart shortly after being flushed, and (4) are safe to flush.

66. Specifically, the FTC’s complaint alleges that “[b]ecause of their composition, non-woven fabrics do not break down in water in a reasonably short amount of time. As a result, products made from them can clog household plumbing systems, household septic systems, public sewer systems, and sewage treatment plant systems after being flushed.”⁷⁶ The complaint also charges that the materials Nice-Pak disseminated to its customers “did not accurately reflect real-world conditions Nice-Pak Wipes would encounter after being flushed (i.e., conditions that exist in household toilets, plumbing, or septic systems, or in public sewer systems or public wastewater treatment facilities).”⁷⁷ The complaint further asserts that Nice-Pak:

alone or in concert with others...developed unsubstantiated flushability claims for use by its trade customers based on this purported substantiation. Through these means, [Nice-Pak] provided trade customers with the means and instrumentalities to deceive consumers by disseminating these unsubstantiated flushability claims in marketing...Nice-Pak Wipes under private labels, such as...CVS’s Flushable Cleansings Wipes

67. As part of the proposed consent order, Nice-Pak is prohibited from making any representation that its flushable wipes: (1) are safe for sewer systems, (2) are safe for septic systems, (3) break apart shortly after flushing, (4) will not clog household plumbing systems, (4) will not clog household septic systems, (5) are safe for plumbing, (6) are safe to flush, (7) dissolve or disperse when interacting with water, or (8) are flushable, unless the representation is based on “competent and reliable evidence,” including “tests, analyses, research, studies, or other evidence based on the

⁷⁶ Complaint, *In the Matter of Nice-Pak Products, Inc.*, File No. 132-3272, at 1, available at <https://www.ftc.gov/system/files/documents/cases/150518nice-pakcmpt.pdf> (last visited May 18, 2015).

⁷⁷ *Id.* at 2.

expertise of professionals in the relevant area, that have been conducted and evaluated in an objective manner by qualified persons, using procedures generally accepted in the profession to yield accurate and reliable results.”⁷⁸

68. The consent order requires Nice-Pak to demonstrate that its flushable wipes “disperse[] in a sufficiently short amount of time after flushing to avoid clogging, or other operational problems in, household and municipal sewage lines, septic systems, and other standard wastewater equipment.” The term flushable, according to the consent order, means that the flushable product “dispersed in a sufficiently short amount of time after flushing to avoid clogging, or other operational problems in, household and municipal sewage lines, septic systems, and other standard wastewater equipment” and that testing to substantiate the use of the term flushable on a products must “substantially replicate the physical conditions of the environment in which the Covered Product is claimed, directly or indirectly, expressly or by implication, to be properly disposed of; or, if no specific environment is claimed, then in all environments in which the product will likely be disposed of.”⁷⁹

69. Products labeled as flushable must disperse so that to not get stuck in or clog homeowners’ plumbing systems, and requires manufacturers of purported “flushable” wipes to design products that not only pass through homeowners’ home plumbing systems, but also do not cause damage to municipal sewer lines, sewage treatment plants or other public wastewater treatment facilities.

⁷⁸ Agreement Containing Consent Order, *In the Matter of Nice-Pak Products, Inc.*, File No. 132-3272, at 3, available at <https://www.ftc.gov/system/files/documents/cases/150518nice-pakorder.pdf> (last visited May 18, 2015).

⁷⁹ *Id.* (emphasis added).

FACTUAL ALLEGATIONS RELATED TO THE PLAINTIFF

70. Beginning around March or April 2015, Plaintiff began purchasing Kirkland Signature Wipes in and around his home in Jacksonville, Oregon.

71. After flushing Defendants' purportedly flushable wipes products down his home toilet, Plaintiff experienced plumbing issues, including clogging of his home plumbing. In particular, on or around May 18, 2015, Plaintiff's plumbing became clogged and, as a result, Plaintiff had to employ the help of a professional plumber to come and unclog his home plumbing. Plaintiff complained of his experience directly to Costco

72. Plaintiff did not purchase any flushable wipes products other than the Kirkland Signature Wipes.

73. Prior to purchasing Kirkland Signature Wipes, Plaintiff read the label on the products, which indicated that the wipes were "flushable[.]" and purchased the Kirkland Signature Wipes specifically because they were advertised as safe to flush down toilets. Wipes labeled by Defendants as "flushable" cost more than similar products without misleading advertisements and misrepresentations regarding their flushability, and would have cost less absent the false and misleading information. Furthermore, Plaintiff purchased them because they were labeled as "flushable" and would not have purchased the wipes had they not been labeled as such.

74. Plaintiff and members of the Class paid more for Defendants' flushable wipes than they otherwise would have had they not been misled by the false and misleading labeling and advertisements and misrepresentations complained of herein.

75. In addition to sustaining damages associated with paying more money per wipe for flushable wipes rather than purchasing comparable, but non-flushable, wipes, Plaintiff also sustained damages in the form of significant plumbing costs to unclog the piping in their home.

76. Plaintiff were unaware and could not have discovered, even in the exercise of reasonable diligence, that Defendants' flushable wipe products would cause harm to their home plumbing when flushed.

77. Plaintiff and members of the Class would not have purchased Defendants' flushable wipes at the prices they did, or would not have purchased the flushable wipes at all, absent Defendants' false and misleading misrepresentations.

78. For these reasons, Defendants' flushable wipes were worth less than what Plaintiff and members of the Class paid for them.

79. Plaintiff and members of the Class were induced to, and did, purchase flushable wipes instead of competing products based on the false statements and misrepresentations described herein.

80. Plaintiff and members of the Class lost money as a result of Defendants' deception in that they did not receive what they paid for. In particular, Plaintiff has paid approximately \$175 in plumbing costs, including hiring a professional plumber.

81. Plaintiff and members of the Class altered their position to their detriment and suffered damages in an amount at least equal to the amount they paid for Defendants' flushable wipes.

**PLAINTIFF'S EXPERIENCE IS REPRESENTATIVE
OF THE EXPERIENCE OF THE CLASS**

82. Plaintiff and members of the Class experienced plumbing and sewer problems after flushing flushable wipes down home toilets. Because of these issues, Plaintiff and members of the Class could not flush the wipes down toilets without suffering harm to the plumbing in their homes.

83. Defendants deny that flushable wipes cause any harm to plumbing, sewer or septic systems and continue to represent that their flushable wipes are able to be flushed without any adverse consequences.

84. Customer complaints displayed on the internet identify a sampling of consumers who complained of damage to their plumbing and sewer systems due to flushing of flushable wipes. Such complaints include the following:

Was looking down the barrel of a \$400 plumbing bill but fortunately the plumber was able to retrieve all the of the fully intact “flushable” wipes without having to dismantle the toilet. Be aware that these are NOT flushable regardless of the packaging claims.⁸⁰

* * *

First of all, they are difficult to get out in 1 piece, but mostly they do not break down, had to pay a RotoRooter guy to snake the line, \$198 later and all he found were these clogging up the main line. Don't be fooled, these are not flushable.⁸¹

* * *

We recently bought several boxes of these “flushable” wipes. Fast forward to today when my landlord had to get our sewer line snaked and clean up a basement flooded with sewage because these wipes did not break down at all once they were flushed. We had no idea that these would clog our sewer lines especially since the box claims they are safe to flush and that they are safe for sewer and septic systems. THIS IS NOT TRUE. Save yourself time and money and either do not buy these wipes or do not flush them if you buy them, this will save you lots of time and money down the road.⁸²

85. Similar posts even appear on Defendant Costco's website where consumers can review their Kirkland Flushable Wipes. Posters have commented that they have had plumbing issues:

Cleans your wallet, too. Do not use with septic!

Pros: cleans your bum nicely

⁸⁰ http://www.amazon.com/Kirkland-Signature-Flushable-Pre-moistened-Entire/product-reviews/B00788NICY/ref=cm_cr_pr_viewpnt_sr_1?ie=UTF8&filterBy=addOneStar&showViewpoints=0&sortBy=bySubmissionDateDescending

⁸¹ http://www.amazon.com/Kirkland-Signature-Flushable-Pre-moistened-Entire/product-reviews/B00788NICY/ref=cm_cr_pr_viewpnt_sr_1?ie=UTF8&filterBy=addOneStar&showViewpoints=0&sortBy=bySubmissionDateDescending

⁸² <http://www.amazon.com/Kirkland-Signature-Flushable-Pre-moistened-Entire/dp/B0005A7FDG>

Cons: leads to expensive maintenance (clogs), does not break down in septic system

“For the last year, we have enjoyed using these wipes that claim they are safe for septic systems. However, yesterday I had to pay to have my septic line snaked to clear a clog.

The culprit? These Kirkland Signature “flushable wipes” from Costco.

The tank was full of wipes that did not break down, so we had to pump the tank as well. Other than the obvious human waste and toilet paper, these wipes from Costco were the only other thing we’ve flushed down the toilet.

According to our well-experienced septic specialist, our septic system was functioning great, with the exception of all these Kirkland wipes. He strongly advised us not to flush them any more--he’s seen so many clogs caused by them.

So while it’s nice to clean your bum with these moist wipes, do not flush them, unless you want them to also clean out your wallet.”⁸³

* * *

Just paid a hefty plumbing bill

Cons: clogs pipes

“We just started using these wipes about 6 months ago. Prior to that, we had zero problems with our plumbing. This morning, we had a sewage backup because the pipes were clogged. We made an emergency call to a plumber. He used a snake type device and pulled out a wad of these wipes. He said these are the worse things for your pipes. He told us that just because they say ‘disposable’ on the label doesn’t mean they are. Expensive lesson for us! We will never use these again!”⁸⁴

* * *

I love the wipes, but must live without them.

Pros: cleans your rear.

Cons: clogs your drains.

“My main line gets clogged every few months. Snaked it myself and pulled out wipes wrapped around the snake. They didn’t appear to be “broken down” much.

⁸³ <http://www.costco.com/Kirkland-Signature%E2%84%A2-Moist-Flushable-Wipes,-600-Wipes.product.11767169.html>

⁸⁴ <http://www.costco.com/Kirkland-Signature%E2%84%A2-Moist-Flushable-Wipes,-600-Wipes.product.11767169.html>

Never had a problem in my main until I started using these wonderful moist, NON-flushable wipes. My house is 50+ years old. You'll probably have better luck if your house is newer."⁸⁵

* * *

MAJOR CLOGGING HEADACHE

Pros: cleans well

Cons: clogs your plumbing !

"I Agree with every other user that said NOT FLUSHABLE !! Holy heck . . . what a pain in the hiny !!!! DO NOT NOT NOT flush . . . even if you are one of the 'lucky ones' . . . eventually you will pay and your system will clog too, you have been warned. Now , my husband was finally able to clear the clog with a huge plumbing snake and working on it for an hour . . . and now we need a new toilet as he destroyed the whole porcelain surface inside the toilet bowl GGGrrrrrrr thanks ALOT Kirkland"⁸⁶

* * *

Not Flushable Afterall

Pros: none if not really flushable

Cons: expensive clogged drains and sewer systems

"Our drains slowly became so clogged the main finally clogged completely, on the weekend of course. When handing us his \$500 invoice, the plumber said the trouble was flushable wipes. A quick Google search brings up lots of hits on how America's sewer systems are struggling to manage so-called "flushables". An expensive lesson learned here."⁸⁷

* * *

Septic Systems

Pros: pleasant smell, soft

⁸⁵ <http://www.costco.com/Kirkland-Signature%E2%84%A2-Moist-Flushable-Wipes,-600-Wipes.product.11767169.html>

⁸⁶ <http://www.costco.com/Kirkland-Signature%E2%84%A2-Moist-Flushable-Wipes,-600-Wipes.product.11767169.html>

⁸⁷ <http://www.costco.com/Kirkland-Signature%E2%84%A2-Moist-Flushable-Wipes,-600-Wipes.product.11767169.html>

Cons: not biodegradable, bad for septic systems, very thin, rip easily

“We started using these wipes about 10 months ago. Our grandchildren love them, however, our septic system did not. Recently had septic pumped and found that all the last 10 months of wipes had not “biodegraded” as promised. Our septic service said this was not the 1st problem he’d seen with these wipes.”⁸⁸

* * *

Do Not Flush

“After using this product for about 18 months, my sewer clogged. \$4000.00 to repair.”⁸⁹

* * *

Not flushable - remove flushable from name of prod

Pros: great - but not flushable

Cons: not flushable

Model Number: L13075

“We had sewer trouble due to using this product and Roto Rooter had to come and clean out our sewer. It says Kirkland Signature, moist flushable wipes . . . these are not flushable and the word flushable needs to be removed from the package. Please address this immediately and make up new labels removing the word “Flushable” please!”

86. The problems described by online posters and consumers evince prevalent and ongoing problems experienced by purchasers of flushable wipes, including Plaintiff and the Class members. Defendants’ misleading marketing and advertising of the Kirkland Signature Wipes cause similar problems, which, upon information and belief, were apparent and are known to Defendants. Although flushable wipes may be used and disposed of in the garbage, like non-flushable wipes, Defendants market and sell flushable wipes at a higher cost than comparable, non-flushable wipes.

⁸⁸ <http://www.costco.com/Kirkland-Signature%E2%84%A2-Moist-Flushable-Wipes,-600-Wipes.product.11767169.html>

⁸⁹ <http://www.costco.com/Kirkland-Signature%E2%84%A2-Moist-Flushable-Wipes,-600-Wipes.product.11767169.html>

For example, Kirkland Signature Moist Flushable Wipes cost \$0.028 per wipe, whereas comparable wipes by Huggies and Pampers that are not labeled as flushable sell for \$0.02 per wipe, or nearly half the cost of flushable wipes. Rather than properly labeling or including a sufficient warning on flushable wipes packaging, Defendants have ignored complaints surrounding products labeled as flushable, thereby causing injury or damage to Plaintiff and members of the Class while providing themselves with additional and unjust financial gain.

CLASS ACTION ALLEGATIONS

87. Plaintiff brings this action pursuant to Federal Rules of Civil Procedure 23(a), (b)(2), and (b)(3) individually and as a class action on behalf of the following proposed classes:

National Kirkland Class: All persons and entities in the United States who purchased the Kirkland Signature Wipes.

Oregon Kirkland Class: All persons and entities in the State of Oregon who purchased the Kirkland Signature Wipes.

88. Upon completion of discovery with respect to the scope of the Class, Plaintiff reserves the right to amend the Class definition. Excluded from the Class is Defendants, its parents, subsidiaries and affiliates, directors and officers, and members of their immediate families. Also excluded from the Class are the Court, the Court's spouse, all persons within the third degree of relationship to the Court and its spouse, and the spouses of all such persons.

89. Numerosity: The Class is so numerous that joinder of all individual members is impracticable. While the exact number and identities of members of the Class are unknown to Plaintiff at this time and can only be ascertained through appropriate discovery, upon information and belief, Plaintiff alleges that the Class is comprised of thousands of individual members geographically disbursed throughout the United States. The number of Class members and their geographical disbursement renders joinder of all individual members impracticable if not impossible.

90. Commonality: There are questions of fact and law common to members of the Class that predominate over any questions affecting solely individual members including, *inter alia*, the following:

(a) whether Defendants misrepresented the effect of flushing flushable wipes on plumbing and sewers, and otherwise mislabeled flushable wipes so as to have the consumer believe that the flushable wipes would not cause harm to home plumbing and sewers;

(b) whether the actions and activities of Defendants violated consumer fraud provisions of Oregon's Unlawful Trade Practices Act, ORS 646.605 et seq.;

(c) whether Defendants' business practices violate Oregon law, for which Plaintiff and members of the Class may recover damages;

(d) whether Defendants knew or should have known that the labeling on flushable wipes was false when issued;

(e) whether Defendants misled consumers into believing that the flushable wipes were able to be flushed without adverse effects on plumbing and sewer systems;

(f) whether Defendants breached their warranties to consumers concerning the flushable wipes;

(g) whether Defendants was unjustly enriched by the sale and distribution of the misbranded or mislabeled flushable wipes to consumers;

(h) whether Plaintiff and members of the Class are entitled to statutory relief;

(i) whether Plaintiff and members of the Class are entitled to punitive relief;

(j) whether Plaintiff and members of the Class are entitled to compensatory relief; and

(k) whether Plaintiff and members of the Class have sustained damages, and, if so, what is the proper measure of damages.

91. Typicality: Plaintiff' claims are typical of the members of the Class they seek to represent. Plaintiff and all other members of the Class sustained damages arising out of Defendants' common course of conduct as complained herein. The losses of each member of the Class were caused directly by Defendants' wrongful conduct alleged herein. The amount of money at issue is such that proceeding by way of class action is the only economical and sensible manner in which to vindicate the injuries sustained by Plaintiff and members of the Class.

92. Adequacy: Plaintiff will fairly and adequately protect the interests of the Class. Plaintiff's claims are coextensive with, and not antagonistic to, the claims of the other members of the Class. Plaintiff are willing and able to vigorously prosecute this action on behalf of the Class, and Plaintiff has retained competent counsel experienced in litigation of this nature.

93. Plaintiff bring this action under Rule 23(b)(3) because common questions of law and fact predominate over questions of law and fact affecting individual members of the Class. Indeed, the predominant issue in this action is whether Defendants mislabeled and falsely advertised their flushable wipes and whether that mislabeling and false advertising caused damages to Plaintiff and the members of the Class. In addition, the expense of litigating each Class member's claim individually would be so cost prohibitive as to deny Class members a viable remedy. Certification under Rule 23(b)(3) is appropriate because a class action is superior to the other available methods for the fair and efficient adjudication of this action, and Plaintiff envisions no unusual difficulty in the management of this action as a class action.

94. In addition, the Class may also be certified under Rule 23(b)(2) because:

(a) the prosecution of separate actions by individual Class members would create a risk of inconsistent or varying adjudication with respect to individual Class members that would establish incompatible standards of conduct for Defendants;

(b) the prosecution of separate actions by individual Class members would create a risk of adjudications with respect to them that would, as a practical matter, be dispositive of the interests of other Class members not parties to the adjudications, or substantially impair or impede their ability to protect their interests; and/or

(c) Defendants have acted or refused to act on grounds generally applicable to the Class, thereby making appropriate final declaratory and/or injunctive relief with respect to the members of the Class as a whole.

95. The undersigned counsel for Plaintiff and the Class request that the Court appoint them to serve as Class counsel; first on an interim basis and then on a permanent basis pursuant to Federal Rule of Civil Procedure 23(g). Undersigned counsel will fairly and adequately represent the interests of the Class, have identified or investigated the Class' potential claims, are experienced in handling class actions, other complex litigation, and consumer claims of the type asserted in the action, know the applicable law, will commit sufficient resources to represent the Class, and are best able to represent the Class.

COUNT I

Negligent Misrepresentation

96. Plaintiff repeats and realleges the allegations contained in all preceding paragraphs as if fully set forth herein.

97. Starting no later than 2012, Defendants misrepresented to Plaintiff and the Class the effects flushing flushable wipes down toilets has on plumbing and sewer systems.

98. Starting no later than 2012, Defendants omitted material facts regarding the effect flushing flushable wipes down toilets has on plumbing and sewer systems.

99. Defendants owed a duty to Plaintiff and the Class to exercise reasonable care when issuing statements or disclosures regarding the nature flushable wipes.

100. Upon information and belief, the statements or disclosures regarding the ability of flushable wipes to be flushed without having adverse effects on plumbing and sewer systems were likely to deceive or confuse Plaintiff and members of the Class.

101. In reliance upon Defendants' representations that the Kirkland Signature Wipes products were flushable, Plaintiff purchased the products and flushed them down their home toilets.

102. The referenced claims have also influenced or are likely to influence future decisions of consumers and the buying public. Plaintiff and the Class, by purchasing flushable wipes, reasonably acted in reliance upon the truth of the representations made by Defendants.

103. As a direct and proximate result of the Plaintiff' and the Class' reliance upon the representations made by Defendants, as described above, Plaintiff and the Class have sustained damages and ascertainable loss.

COUNT II

Breach of Express Warranty

104. Plaintiff repeats and realleges the allegations contained in all preceding paragraphs as if fully set forth herein.

105. Beginning at an exact date unknown to Plaintiff, but at least since three years prior to the filing date of this action, and as set forth herein, Defendants represented to the public, including Plaintiff, on the label of their Kirkland Signature Wipes and other flushable products, the product was safe to flush down the toilet. For example, Defendants represented to the public, including Plaintiff, by their advertising, packaging and other means, that flushable wipes are "sewer and septic

safe” and “break up after flushing.” These promises became part of the basis of the bargain between the parties and thus constituted an express warranty.

106. Thereon, Defendants sold the flushable wipes to Plaintiff and other Class members, who bought the flushable wipes from retailers selling Defendants’ flushable wipe products.

107. Defendants breached the express warranty in that the goods did not, in fact, flush without adverse consequences to home plumbing and sewer systems as set forth in detail herein. As a result of this breach, Plaintiff and other consumers in fact did not receive goods as warranted by Defendants.

108. As a proximate result of this breach of warranty by Defendants, Plaintiff and other consumers have been damaged in an amount to be determined at trial.

COUNT III

Violations of Oregon’s Unlawful Trade Practices Act, ORS 646.605 et seq.

109. Plaintiff repeats and realleges the allegations contained in all preceding paragraphs as if fully set forth herein.

110. Defendants have used and employed unconscionable commercial practices, deception, fraud, misrepresentations, and/or the knowing concealment, suppression, and/or omission of material facts with the intent that others rely thereon (or, in the case of an omission, with the belief that the parties were ignorant of the true facts), in connection with the marketing, distributing, sale, and advertisement of the flushable wipes.

111. Plaintiff and the other members of the Class, unaware of Defendants’ deception, purchased Defendants’ flushable wipe products. Had Plaintiff and the other members of the Class known that Defendants was deceiving them, they would not have purchased flushable wipes or paid the price that they did.

112. By virtue of the foregoing, Defendants has violated the Oregon's Unlawful Trade Practices Act, ORS 646.605 et seq.

113. As a direct and proximate result of Defendants' actions, Plaintiff and the Class have suffered damages in an amount to be proven at trial.

COUNT IV

Unjust Enrichment

114. Plaintiff repeats and realleges the allegations contained in all preceding paragraphs as if fully set forth herein.

115. As a result of Defendants' fraudulent and misleading labeling, advertising, marketing and sale of its flushable wipes, Defendants were enriched at the expense of Plaintiff and members of the Class.

116. It would be against equity and good conscience to permit Defendants to retain the ill-gotten benefits received from Plaintiff and members of the Class, in light of the fact that flushable wipes were not flushable, as Defendants purported them to be. Thus, it would be unjust and inequitable for Defendants to retain the benefits without restitution to Plaintiff and members of the Class of all monies paid to Defendants for the products at issue.

117. As a direct and proximate result of Defendants' actions, Plaintiff and the Class have suffered damages in an amount to be proven at trial.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff demands judgment against Defendant for himself and the members of the Class as follows:

A. An Order determining that this action is a proper class action and certifying Plaintiff as a representative of the Class;

B. An Order awarding statutory, compensatory and punitive damages in favor of Plaintiff and the other Class members against Defendant for Defendants' violation of Oregon's Unlawful Trade Practices Act, ORS 646.605 et seq., and for all damages sustained as a result of Defendants' wrongdoing, in an amount to be proven at trial, including interest thereon;

C. An Order declaring Defendants' practices to be improper, unfair, unlawful and/or deceptive and requiring Defendant to provide refunds to Plaintiff and members of the Class;

D. A temporary, preliminary or permanent injunction: (i) ordering Defendant to make disclosures, through corrective advertising, to inform the public of the true nature regarding the effect on plumbing when flushable wipes are flushed; (ii) enjoining Defendant from selling flushable wipes until the proper disclosures set forth above are issued; and (iii) ordering Defendant to waive or reimburse any fees to be incurred by consumers in connection with plumbing services needed to repair plumbing systems;

E. Disgorgement and restitution;

F. An Order awarding Plaintiff and the Class their reasonable costs and expenses incurred in this action, including counsel fees and expert fees; and

G. Such other and further relief as the Court may deem just and proper.

JURY DEMAND

Plaintiff hereby demands a trial by jury.
